

Which aspects of diversity are already being addressed, are currently being addressed, or are being prioritized at your institution?

To what extent is diversity already taken into account at the program level?

Family-friendly university and equal opportunity

Removal of barriers in STEM studies

Diversity among the student body is also a top priority at my university: balancing family, work, and studies

Recognition of prior experience (no age discrimination)

Diversity of students (especially balancing family and work)

Colleges and universities focus on "reasonable accommodations" rather than "accessibility" as a general rule. What is needed here is a change of perspective in teaching and Learning conditions required

International reviewers as an opportunity for exchange

Diversity in continuing education (different entry levels)

Participation in Stifterverband's Diversity Audit

Studying is Part-time and work-study options available

Information on university contacts provided during courses: ombudspersons, equality, inclusion, etc.

Inclusion-oriented teacher education programs

Blended learning and block models in part-time programs to balance studies, work, and family

As part of the institutional accreditation (TH Köln)

Survey of expectations and needs at the beginning of courses

Collection of key metrics

Reporting center for experiences of racism

Addressing migration, interculturality, gender, and inclusion in courses

Alternative assessment methods

to accommodate

Transparency through recognition and Recognition of prior learning

International guests: Internationalization@home: enables a large number of students to gain different perspectives

Flexible study models, a mix of online and in-person instruction for flexible time management in part-time study and continuing education

E.g., women in STEM fields

Heterogeneous Groups

Increasing the appeal of technical degree programs among women

Compensating for disadvantages

Bilateral and international degree programs
